

zvoove One: new cloud solution for temp staffing agencies

Market-leading industry solution for temp staffing agencies in Germany – now with all the advantages of the cloud, an industry leading technology stack in combination with rock solid, compliant and fully digitized processes

Wiesbaden/Lohne, 18th October 2023 – [zvoove Group](#), the market-leading provider of digitalization solutions for temporary staffing and cleaning service providers in Europe, today officially unveiled its new, modern and intuitive industry software, known as zvoove One, at the STAFFINGpro trade event in Wiesbaden, Germany. zvoove One is the product of over 30 years of industry knowledge combined with the latest cloud technology and allows for even simpler and clearer digitalization of all temporary staffing processes – from application management, order management, employee management, time tracking and scheduling to invoicing, payroll and business processes analysis.

"Our mission has always been to manage all temporary staffing processes in the industry from A-Z in a legally secure way, thereby making the daily work of temporary staffing agencies, their employees and customers easier. We call this end-to-end digitalization," states Sascha Alber, Chief Product & Technology Officer of zvoove Group. "With zvoove One, we are bringing the standard industry solution of the German temporary staffing sector into the cloud and thus taking the whole industry to a whole new level."

In addition to the completely redesigned user interface and the simplified processes, users benefit from all the advantages that software deployment in the cloud has to offer. These include:

- easy access via the internet;
- automatic backups and updates;
- no need to deploy hardware;
- highest security standards via the Microsoft Azure cloud;
- legally secure data storage in Europe;
- a variety of interfaces to easily interlink third-party solutions.

"Over the past few years, we have invested tens of millions in zvoove One and now we are heralding a new era in the German market with our new software-as-a-service solution for temp staffing providers," states Oliver Muhr, CEO of zvoove Group. "The initial feedback from the industry has been phenomenal and we are launching further innovations based on artificial intelligence as well as additional interfaces and workflows that provide a major competitive advantage for our customers."

The ERP solution that is currently being used very successfully by over 2,000 temporary staffing providers in Germany, has been entirely moved to the cloud with zvoove One. With the new solution, zvoove simplifies and modernizes the processes and technology of the underlying and established core software known as "zvoove for temporary staffing providers". Customers can now use two interfaces at any time to access one and the same database: the completely modernized user interface as well as the previous familiar version. Compliant processes are provided at all times across the board. Customers can use all established processes while at the same time benefiting from successively more efficient processes and modern technology.

A few months ago, zvoove received the prestigious seal of the [Federal German Ministry of Education and Research \(BSFZ\)](#), for its development approach which is based on the criteria contained in the German Research Grants Act (Forschungszulagengesetz).

You can find zvoove at stall C.13 at the [STAFFINGPro](#) trade event in Wiesbaden.
